

October 11, 2023

Dear Sir or Madam:

Community Rehabilitation Hospital North, South and West CEOs and leadership teams are pleased to endorse the mission of Villa Licci's residential apartments for adults with traumatic brain injury.

This project aligns with our mission to improve function and quality of life of our patients. Providing survivors of a brain injury access to appropriate housing and a living environment that enables a level of independence will be a key component to healing and improving quality of life.

To date, there are no long-term independent or semi-independent living opportunities for our population. Villa Licci will help to fill this compelling gap in the continuum of care for brain injury survivors.

Our hospitals are joint-venture partners with Community Health Network, through this partnership, we are mutually invested in a community that best facilitates independent living for individuals with brain injury in the Central Indiana region.

We support Villa Licci in establishing appropriate housing and a living environment that enables independence and enhances the quality of life for individuals impacted by brain injury.

Sincerely,

*Roxy Stacy, North CEO*

*Michelle Russell, South CEO*

*Catherine Middleton, West CEO*
